DETAILED ACTION

Response to Arguments

Applicant's arguments filed May 31, 2005 have been fully considered but they are not persuasive.

The Applicant lists three points of argument.

Regarding the first argument, that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the fixing of sutures between "first cylinder (120)" and "second cylinder (130)") are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Regarding the second argument, it has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so perform. The phrase "adapted to" is an example of language that suggests or makes optional but does not limit a claim to a particular structure and therefore does not limit the scope of a claim or claim limitation.

Regarding the third argument, as noted previously, even if the cited prior art does not work as well as the presently claimed invention, as long as it is **capable** of fixing sutures, even poorly, it meets the claimed structural limitations. Applicant's arguments are directed to obviousness, i.e. how a person skilled in the art would interpret Johnson, however the rejection was that Johnson anticipated the presently claimed invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 12-15, 19-21 and 42-43 remain rejected under 35 U.S.C. 102(b) as being anticipated by Johnson (5,766,240). Johnson discloses an apparatus comprising: a first cylinder (120) having first and second ends, the second end having an adjacent exterior annular lip (120.1) for securing to an interior groove (130.6) on a second cylinder (130). Johnson also discloses an apparatus comprising: a first cylinder having first and second ends, the second end having an adjacent exterior annular groove for securing to an interior lip on a second cylinder (Figs. 7 and 8). The first cylinder has a fabric annular cuff surrounding the exterior surface adjacent the first end. The first and second securing means of Johnson are **capable** of “fixing sutures therebetween”, and therefore meet the structural limitations.

Allowable Subject Matter

Claims 9-11, 16-18 and 22-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
